

COUNTRYSIDE CONSULTING

Corporate Champion of Change

Countryside Consulting, Inc. provides accounting services to nonprofit organizations in Southeast Pennsylvania with an eye on measurable results. The firm is celebrating 25 years of delivering these valuable services in our community while creating policies and practices that allow women to thrive in their workplace. CCI's team of highly respected, experienced accounting professionals provide client specific solutions in their roles as part time bookkeepers, accountants, controllers, and chief financial officers.

With flexible work hours and remote work as standard, Countryside Consulting, led by founder and president Louise Schorn Smith, intentionally recruits women returning to the work force from The Mom Project. She is committed to helping women remain active in the workforce by designing and supporting a better workplace.

CCI received the 2022 Corporate Partner Award from Maternal and Child Health Consortium of Chester County for its dedicated service to MCHC, its mission, and the children & families of Chester County. This year, The Fund is honored to recognize Countryside's work to advance professional women with our 2023 Corporate Champion of Change Award.

“Founder and President, Louise leads by example and most importantly, she does it through her passion and devotion to Chester County foundations and the community as a whole. Her advocacy is contagious, and she has been a top role model for many women and girls in Chester County.”
